

Attendance Review for PowerSchool

Author: Brent Johnson

Date: 6/24/2011

Version: 1.1.0

This customization allows teachers and administrators to review meeting attendance taken for course sections by month or 5 day work week. The attendance review will show either an attendance code or some special text based on the current calendar schedule for the class section being reviewed (See explanation below).

The custom pages are designed to be printable. Use the printer icon in PowerSchool 7 that appears above the report. The printout will also include a signature line that may use if their school requires paper documentation and teacher verification of weekly attendance.

Attendance Review Special Text Explanation:

Not Enrolled (N/E)

The student was no longer enrolled in the current class section on this day. Students not enrolled in a class section for the whole week being viewed will not even be listed. So this is only seen if a student is enrolled for a partial week.

Not in Session (N/S)

The school calendar is flagged as not in session for the days where this is shown.

Not Scheduled (N/C)

The class section is not scheduled to meet on the days where this is shown.

Files Updated

- /teachers/menu.html*
- /admin/teacherschedules/sched.html

*This file has a small alteration that adds links to the teacher attendance review pages. If this page has already been modified by another customization on your server, please refer to the installation notes below on how to merge the links into this page.

Files Added

- /images/busy_blue.gif
- /scripts/jquery-1.5.1.min.js
- /teachers/weekatt.html
- /teachers/monthatt.html
- /admin/teacherschedules/attreview/weekatt.html
- /admin/teacherschedules/attreview/monthatt.html

Files Removed

The following files may now be removed from your server's custom web_root if a previous version of this customization was installed.

- /teachers/weekattdata.html
- /teachers/monthattdata.html
- /admin/teacherschedules/attreview/weekattdata.html
- /admin/teacherschedules/attreview/monthattdata.html

Installation

- Open the zip file and add the contents of the web_root directory to the same locations in your PowerSchool server's custom/web_root folder.
- If using an image server, make sure the /scripts and /images folders are copied to the proper

location on the image server.

- If teachers/menu.html is already modified by another customization then merge the following code into menu.html in order to create links to the attendance review pages: [Weekly Attendance Review](weekatt.html?sectionid=~[gpv:sectionid])
[Monthly Attendance Review](monthatt.html?sectionid=~[gpv:sectionid])

Usage

PowerTeacher

- Select a backpack icon for a teacher's class.
- Click on link for weekly or monthly attendance review on left navigation menu.
- Navigate through work weeks or months to review class attendance.
- Use the print button on the page to print the attendance screen if desired. The printout will have the currently viewed attendance report and a signature line.

Admin Portal

- Select *Teacher Schedules* from the left navigation menu.
- After a teacher is selected, choose the attendance review links next to the class section to review.

Version History

v 1.1.0 (6/23/11)

- Changed layout. Compatible only with PowerSchool version 7.x
- Merged data query files into custom pages.
- Fixed problem with SQL queries that occurs on PS7 servers.
- Including a more recent jquery script file(version 1.5.1).

v 1.0.1 (1/19/10)

- Fixed queries so that the first date a student left a class is displayed as Not Enrolled instead of a blank.

v 1.0 (10/27/09)

- Merged Weekly and Monthly Attendance Review Projects
- Added attendance reviews to admin portal. Accessible from teacher schedules page.
- Added 'meeting' column to results.
- Initial Private Release.
